ASBESTOS HAZARD EMERGENCY RESPONSE ACT (AHERA) NOTIFICATION

The United States Environmental Protection Agency (USEPA) requires that each year, district workers and building occupants receive notification of asbestos removal or abatement activities such as a response action or inspection (EPA 40 CFR 763 Subpart E).

This communication serves to inform all parents, teachers, administrators and all other employees that the three-year re-inspection required by law, was performed in June 2009 by Micro Air, Inc. of Indianapolis, Indiana. Updated asbestos management plans are available for review in the main office of each building. All asbestos-containing materials that remain are in good condition and are located in primarily in inaccessible areas. The next three-year re-inspection will be due in 2012.

Each building will continue to have a three-year re-inspection as required by AHERA. All abatement projects have been and will continue to be performed by State of Indiana and EPA approved asbestos abatement contractors. No asbestos abatement projects are currently scheduled for the 2010-11 school year.

Any questions regarding asbestos removal projects or any asbestos related issues should be addressed to Debra Smith, Business Manager/Designated Person, at (765) 395-3341.
